

AMICO ARCHITECTURAL METAL LOAD TABLE

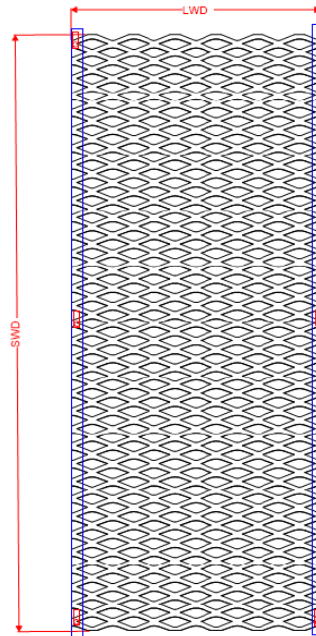

Bellesa 5005-H34 0.081" Aluminum Single Span LWD Wind Load Chart

Bellesa:
 -1.2" LWD x 0.625" SWD
 -36% open area

To use wind chart:
 -Determine maximum wind load for project
 -Select appropriate wind load curve
 -If proposed LWD and SWD clip spacing falls below curve then proposed is acceptable

Design Criteria:
 - Min. of L/60 or 1" deflection criteria where L is the largest clip spacing
 -5005-H34 Allowable stress of 9.10ksi
 - Assumed no cantilever at edges

All contents relate exclusively to AMICO products and cannot transfer to other meshes
